#### 1 General information

### 1.1. Administrative data of the test facility

### 1.1.1 Identification of the testing laboratory

Company name: Cetecom ICT Services GmbH Address: Untertürkheimerstr. 6-10

Untertürkheimerstr. 6-10 D-66117 Saarbruecken

Germany

Laboratory accreditation: DAR-Registration No. DAT-P-176/94-D1

Bluetooth Qualification Test Facility (BQTF)

Federal Communications Commission (FCC)

......

Identification/Registration No: 90462

Responsible for testing laboratory: Jakob Reschke

Phone: +49 681 598 0 Fax: +49 681 598 9075 email: info@ict.cetecom.de

#### **1.2.** Notes

The test results of this test report relate exclusively to the test item specified in 1.5. The CETECOM ICT Services GmbH does not assume responsibility for any conclusions and generalizations drawn from the test results with regard to other specimens or samples of the type of the equipment represented by the test item. The test report may only be reproduced or published in full. Reproduction or publication of extracts from the report requires the prior written approval of the CETECOM ICT Services GmbH.

#### 3 Measurements and results

The radiated measurements are performed in vertical and horizontal plane in the frequency range from 9 kHz to 4 GHz in semi-anechoic chambers. The EUT is positioned on a non-conductive support with a height of 0.80 m above a conductive ground plane that covers the whole chamber.

The receiving antennas are conform with specifications ANSI C63.2-1996 clause 15 and ANSI C63.4-2003 clause 4.1.5. These antennas can be moved over the height range between 1.0 m and 4.0 m in order to search for maximum field strength emitted from EUT. The measurement distances between EUT and receiving antennas are indicated in the test set-ups for the various frequency ranges. For each measurement, the EUT is rotated in all three axes until the maximum field strength is received.

The wanted and unwanted emissions are received by spectrum analysers where the detector modes and resolution bandwidths over various frequency ranges are set according to requirement ANSI C63.4-2003 clause 4.2. Antennas are conform with ANSI C63.2-1996 item 15.

9 kHz - 150 kHz: Quasi Peak measurement, 200 Hz Bandwidth, passive loop antenna. 150 kHz - 30 MHz: Quasi Peak measurement, 9 kHz Bandwidth, passive loop antenna. 30 MHz - 200 MHz: Quasi Peak measurement, 120 kHz Bandwidth, biconical antenna. 200MHz - 1GHz: Quasi Peak measurement, 120 kHz Bandwidth, log periodic antenna. >1GHz: Average, RBW 1MHz, VBW 10 Hz, waveguide horn.

All measurement settings are according to FCC 15.209 and 15.207

Untertürkheimer Str. 6-10, 66117 Saarbruecken RSC-Laboratory

## 4 FCC Part 15 Subpart C

### 4.1 Timing of the transmitter

#### Reference

FCC:	CFR Part SUBCLAUSE § 15.35 (c)
IC:	RSS-GEN Issue 2 Section 4.5

#### Plot 1:

Date: 22.JAN.2008 09:44:01

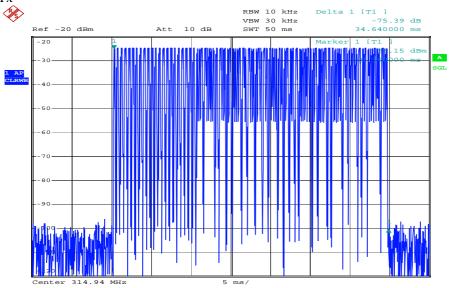

Untertürkheimer Str. 6-10, 66117 Saarbruecken RSC-Laboratory

Phone: +49 (0) 681 598-0 Phone: +49 (0) 681 598-8412 Fax: -9075 Fax: -8484

Test report no.: 2-4723-01-10/07 A Date: 2008-01-25 Page 10 of 26

Date: 22.JAN.2008 09:45:17

The Tx on is: 34.64 ms

Inside the Tx on the duty cycle is 50%

So the calculated TX on is 17.32

The correction factor from peak to average is calculated by

20 x log (duty cycle)

 $20 \times \log (0.17) = -15.39 \text{ dBm}$ 

**Limits:** § 15.35 (c)

(c) Unless otherwise specified, e.g. Section 15.255(b), when the radiated emission limits are expressed in terms of the average value of the emission, and pulsed operation is employed, the measurement field strength shall be determined by averaging over one complete pulse train, including blanking intervals, as long as the pulse train does not exceed 0.1 seconds. As an alternative (provided the transmitter operates for longer than 0.1 seconds) or in cases where the pulse train exceeds 0.1 seconds, the measured field strength shall be determined from the average absolute voltage during a 0.1 second interval during which the field strength is at its maximum value. The exact method of calculating the average field strength shall be submitted with any application for certification or shall be retained in the measurement data file for equipment subject to notification or verification.

Untertürkheimer Str. 6-10, 66117 Saarbruecken RSC-Laboratory
